

Marlboro Energy Audit Discussion – Friday, January 27 meeting with S-J

From the Tuesday MGT discussion, here is a list of questions/issues, etc., that may be part of the Friday discussion at 2PM with S-J and Marlboro (Green Team):

1. Facts and info completed/near completed:
2. Adrienne has bills for one month. She has spoken to finance and DPW.
 - a. Still has to update 2014 building inventory. Possibly one additional structure:
 - i. Stadle farm, site of the farmers' market - no a/c but does run electricity for the warm weather.
3. To be discussed; and what items need to be covered with S-J:
 - a. What information from the 2014 Marlboro Twp Energy Audit would be relevant for the next audit?
 - b. How will one month's worth of bills be compiled? And by whom?
 - i. HVAC systems also need to be identified.
 - c. Who will have responsibility to enter data into the LGEA spreadsheet?
4. Sustainable Jersey questions:
5. S-J point achievement. How does that work for an LGEA project?
6. Identify Tasks involved for an LGEA:
 - a. Who is doing which tasks – S-J vs. Marlboro?
 - b. Within Marlboro, by Township personnel, or by the MGT?
7. Output from the LGEA:
 - a. Per S-J, types of project recommendations that emanate from the LGEA?
 - b. Understanding recommendations.
 - c. Socializing output/recommendations to Township authorities: how addressed by similar sized towns / demographics?
8. Ask S-J what is typical interaction of green team personnel with township personnel?
9. Ask S-J what have similar Twps achieved from LGEAs?
 - a. Look at case studies within S-J.
 - b. Get S-J guidance.
10. Does S-J need to enter a Township building or are they working remotely?
11. From S-J experience, aside from the ESIP [Energy Savings Improvement Program] program noted by Nancy Quirk, what are the range of likely projects that could emanate from a Local Government Energy Audit that we could be preparing township leadership for potential actions (likely targeted for future budget years)?
12. Marlboro questions:
13. Adrienne – we will need to have tasks done by the green team.
 - a. A: how will we produce / complete the tasks.

This is a starting point. Other questions may arise as part of the discussion or S-J's better understanding of the LGEA process.
