

## Marlboro Water Utility Division - Water Customers

The summer season typically sees an increase in outdoor activities which results in an increase in water usage.

High summer water usage combined with abnormally dry conditions challenges public water supply system capabilities throughout the State.

While there are no water use restrictions at this time, we ask you to consider your water usage.

Please use water wisely and make efforts to not waste this valuable resource.

If you would like additional information regarding water conservation please visit the New Jersey Department of Environmental Protection website at:
