INITIAL APPLICATION REVIEW

The Freehold Soil Conservation District has conducted our initial review of the plans submitted for the above referenced application and finds them to be incomplete. The following deficiencies must be addressed in order for the application to be complete.

1. Complete and return the enclosed Ownership Disclosure Affidavit.
2. Include within the Soil Erosion and Sediment Control Plan set a stockpiling detail.
3. Clearly label all stormwater pipe dimensions and conduit outlet protection dimensions on the Soil Erosion and Sediment Control Plan view.
4. Include sheet #22 of 25 within the Soil Erosion and Sediment Control Plan set.
5. Include within the Soil Erosion and Sediment Control Plan set a site specific cross-section of each final outfall and include surrounding grades.
6. Include within the Soil Erosion and Sediment Control Plan sets a site specific profile of each final outfall from the point of discharge through to the stable receiving area.

Please incorporate the above items into a revised soil erosion and sediment control plan and forward three (3) sets, along with supporting calculations, to our office for further review. These plans must be signed and sealed by a professional architect or engineer. Upon review and determination that the items have been correctly and completely addressed in accordance with the State Standards for Soil Erosion and Sediment Control, the application will be considered complete and recommended for certification. If you have any questions, please contact our office.

Respectfully,

Stephen Grosch
