Winter Weather Advisory

Dear Resident,

As we recover from Winter Storm Quinn, we are under a Winter Weather Advisory from Nor'easter Skylar. Snow is expected to begin late this afternoon as rain or rain/snow mix and will then change to snow. Although there is still uncertainty in the storm track, at this time, we are expected to receive 3" of snowfall.

We are aware that many residents sustained tree damage from Quinn. The Department of Public Works (DPW) and the Marlboro Office of Emergency Management (OEM) are currently reviewing an adjustment to the brush collection schedule as detailed in the [Recycling Calendar](#). A letter from DPW will be sent later today detailing schedule changes.

As residents clean up from the storm, the Division of Public Safety reminds you that it is not permissible to place brush in the street. Doing so impedes traffic, causes flooding by blocking flow to the storm drains, and interferes with snow removal. Please place your brush on your property on the house side of your curb.

Finally, as a reminder JCP&L has reported that virtually all residents have had their power restored from Winter Storm Quinn. If you have not, please contact JCP&L. We will keep you updated on Storm Skylar as the track becomes more certain.

Mayor Jon Hornik
