Salvatore Alfieri, Esq. introduced the application to the Board. Mr. Alfieri explained that the Applicant was previously granted a bifurcated use variance, as well as preliminary and final site plan approval, to construct two warehouse/office buildings. The Applicant is now seeking to amend the use variance, as well as amended preliminary and final site plan approval, to construct a single two-story warehouse/office building. A mezzanine area is also proposed as a common area. Access is proposed via a one-way semi-circular paved drive along Tennent Road with a center paved extension to the building along with associated parking

Christian Cueto, P.E. was sworn in and gave testimony. Mr. Cueto provided a history of the prior approval on the site stating that two separate two-story buildings had originally been approved. Each building was to have four units. Mr. Cueto stated that the Applicant is now seeking to construct a single two-story office building which would still have a mix of warehouse/office but a different ratio. Mr. Cueto stated that rather than having individual offices, the Applicant was now proposing to amend the previous approval in order to have a common office/lobby area with 2,724 square feet. He further stated that the access was proposed via a one-way semi-circular gravel drive along Tennent Road. Mr. Cueto testified that twenty-seven (27) total parking spaces were proposed. Mr. Cueto stated that any office space would be accessory to the storage area and will not be leased out or rented for any use not associated with same. Mr. Cueto agreed that the freestanding sign would remain under 60 square feet. Mr. Cueto testified that a barrier would be provided on the top of the retaining wall.

Allison Coffin, P.P., AICP. Was sworn in and gave testimony. Ms. Coffin testified that the Applicant had previously received use variance and that the proofs associated with same remained as true today as it did at that time.
